Based on this information, the Traffic Engineer indicates a Traffic Impact Assessment (TIA) is not required for this development. It should also be noted that the CIP to extend Butler Road to League City Parkway is to be completed approximately May 3, 2013.

Fire Response

Fire Station #2 will be the first responding station with Fire Station #5 being the second fire station responding.

Water & Sewer

Equivalent dwelling units (EDU's) are used to determine the availability and capacity of water and sewer. 1 single-family, detached dwelling unit = 1 EDU. Per the Water and Wastewater Master Plan, Phase I has an allocation of 52 EDUs. Water Production indicates that pressure and capacity are sufficient.

Water service is available from an existing 8-inch water line on the east side of Butler Road.

Sewer service is available to this site from an existing 24-inch sanitary sewer line on the west side of Butler Road. It should be noted that there is a city-owned lift station directly adjacent to the property in the southeast corner of the development.

According to Section 212.010 of the Texas Local Government Code, the Planning and Zoning Commission shall approve a plat if:

The plat conforms to the general plan of the municipality and its current and future streets, alleys, parks, playgrounds, and public utility facilities.

Staff finds that the plat conforms.
